For a start, it begins with a 10 second intro that isn't skippable every time you start the game. Then there's pointless movie sequences which are falsely advertised in the screenshots and video to look like in-game graphics, which are also by the way not skippable. The storyline is boring, pointless and interrupts the little gameplay the game actually has.

As for gameplay, you begin with a SMUP with more mechanics that are less obvious than a standard Bullet Hell game. Each time I played it, I discovered a new button or mechanic for a level that takes about 30 seconds to complete.

Once you beat it, you are put straight into the most boring and confusing tree game. I have no understanding for the ratios on the right, what the lightning is or coming from, when the fruit will spawn if i must avoid the fire sprites or what they were. Before you have even discovered the mechanics, you're into the next level.

And before you know it you're back into the same SMUP Bullet Hell game again with an even easier boss than the first one because the Graze mechanic is too easy to use....

Then you get back to the tree level and angrily will quit the game. You try to give the game another go later on, but when you see the fxcking 10 second intro and refund the game.

The bongo-man can eat my @ss.. This game is good. It's not close to the level of the other Wadjet Eye-published games, but it's not really trying to be. This is a kids' game with a cartoon plot and cartoon humor. That's not to say it does what it's doing badly. There's a lot of lampshade hanging and parody of this kind of genre, it's very clearly self-aware. The puzzles are on the easy side of things pretty much the entire way through and the curve of puzzle difficulty is pretty smooth, adding more complexity the further the game progresses until you have 5 different bots to work with by the end. It's not very long, though (2 or so hours) but it's about as long as it really needs to be. Lighthearted and mildly enjoyable, I'd say this is worth getting cheap, though maybe not full price.

Pros

- Stays true to the AC series
- Beautiful visuals
- 100% enjoyable with controller
- Active and smooth multi-player
- Progression/unlock tree progresses well with campaign

Cons

- Questionable storyline/writing
- Occasionally annoying voice line cheese
- Flight stick limitation
- Don't expect 'realism' if you're an aircraft fanatic
- . short with a bunch of cut scenes and talk scenes but still recommending.. can even play as a funny meme. a major improvement than its predecessor with most aspects

+ I found the horror atmosphere a lot better in part 1, but part 2 certainly does not disappoint it's combined with a lot of action, but it goes perfectly together in this game, usually that's not true in horror games that is a fact

+ fighting system is a lot more interesting more weapons a lot more brutal enemies you can kill in the worst ways also let yourself die by every enemy that grabs you

+ isaac is talking now you get used to it

+ the environment is much more extensive than you are in a children's day stay than in a large church many more places but you are now on a planet where people live in the other part you are sitting alone on a large spaceship with 4 people 2 more but they die really fast in the beginning

+ the suits are awesome

+ nicole is a \u2665\u2665\u2665\u2665\u2665

+ multiplayer is meh for fun for a while but bores quickly. I couldn't finish the game as my "Save is corrupted", which apparently is a bug that was never patched. So unless you intend to play the game in one sitting, just forget it. Too bad, because it's really a good game otherwise.... Mods literally do this better.
